BACHELOR OF COMPUTER SCIENCE
SCHOOL OF COMPUTER SCIENCE
BINA NUSANTARA UNIVERSITY
JAKARTA

FM-BINUS-AE-FSM-144/R0

ASSESSMENT FORM

Course: COMP6065001 - Artificial Intelligence

Method of Assessment: Project

Semester/Academic Year : 3/2025-2026

Name of Lecturer : ………………………

Date : ………………………

Class : ………………………

Topic : Final Presentation

Group Members :	1____________________ 2____________________ 3____________________ 4____________________ 5____________________ 6____________________ 7____________________ 8____________________

Student Outcomes:

SO 3 - Mampu berkomunikasi secara efektif dalam berbagai konteks profesional
Able to communicate effectively in a variety of professional contexts

SO5 - Mampu menjalankan peran secara efektif sebagai anggota atau pemimpin dalam tim dalam melakukan aktifitas yang sesuai dengan ilmu komputer
Able to function effectively as a member or leader of a team engaged in activities appropriate to computer science

SO 6 - Mampu untuk menerapkan teori ilmu komputer dan dasar-dasar pengembangan perangkat lunak untuk menghasilkan solusi berbasis komputasi.
Able to apply computer science theory and software development fundamentals to produce computing-based solutions.

Learning Objectives:

LObj 3.2 - Mampu menerapkan teknik komunikasi yang tepat dalam berbagai konteks profesional.

Able to apply appropriate communication technique in a variety of professional contexts

LObj 5.2 - Mampu bekerja secara efektif sebagai pemimpin tim dalam praktik komputasi
Able to perform effectively as a leader of a team in computing practice

LObj 6.2 - Mampu menerapkan dasar-dasar pengembangan perangkat lunak untuk menghasilkan solusi berbasis komputasi
Able to apply software development fundamentals to produce computing-based solutions

Learning Outcomes:
LO 5 - Apply various learning algorithms to solve the problems
LO 6 - Analyze the role of Ethical in Artificial Intelligence

No	Related LO-LOBJ-SO	Assessment criteria	Weight	Excellent (85 - 100)	Good (75-84)	Average (65-74)	Poor (0 - 64)	Score	(Score x Weight)

Remarks:

ASSESSMENT METHOD

Project

Instructions

1. Students form a group consisting 3-5 people.
2. **[Assessment criteria 3]** This year, we focused in 3 SDG topics: #3 Good Health and Well-being, #12 Responsible Consumption and Production, #13 Climate Action. For each topic, we give 5 problems in Indonesia that can be choosen by each student groups:
   a. Good Health and Well-being
      i. Tubercolosis (TB) detection delays
      ii. Maternal mortality in rural areas
      iii. Malnutrition monitoring in children
      iv. Center hospital overcrowding & referral inefficiency to small clinics
      v. Fake medicine distribution
   b. Responsible Consumption and Production
      i. Food waste in urban supermarkets and markets
      ii. Overproduction in fast fashion/textiles
      iii. Plastic waste mismanagement
      iv. Palm oil mill byproducts
      v. E-waste from electronics
   c. Climate Action
      i. Jakarta flooding from extreme rainfall + sea-level rise
      ii. Forest and peatland fires in Sumatra and Kalimantan
      iii. Mangrove deforestation in coastal areas
      iv. Transportation emissions in major cities
      v. Unpredictable crops yield due to climate change

3. **[Assessment criteria 3]** Design solutions to problems using a computational approach.
4. **[Assessment criteria 3]** Apply the design into a real working application in a form of MVP (Minimum Viable Product). *You may use AI to help you code.*
5. **[Assessment criteria 4]** The project report is made using the PKM-KC/PKM-RE proposal format *(or other formats as agreed with lecturer. Other formats should include background of problem, specific problem definition, proposed solution, results of solution, discussion and conclusion).*
6. **[Assessment criteria 2]** Submit a form of contributorship for each group member. List out in detail about what kind of contributions do you make in the project development. This form of contributorship should be agreed by all group members.
7. **[Assessment criteria 1]** Present your project to the lecturer

Project Output

You are expected to submit the following items:

1. Source code of your application and the instruction manual.
2. Form of Contributorship.
3. Project Report using PKM proposal format (or other format as agreed with lecturer) – with at least 5 citations from trusted sources.
4. Presentation of your project (can be presented live or by video as agreed with your lecturer)

Note for Lecturers:

1. Students collect and present their project in the last week of lecture.
2. Lecturer **must** appoint 1-2 best Project Report for each class.
